

Application Number: 09/396,531

Filing Date: 9/15/99

Inventors: Randall Addington et al.

Title: Bowler's Aid

Assistant Commissioner of Patents

Washington, D.C. 20231

By Facsimile: 703-872-9303

Group Art Unit: 3711

Examiner Name: William Pierce

Attorney Docket No.: 99-1001

This Application has been made special under 37 CFR 102(c) for advancement of examination

Amendment Response to Final Office Action Mailed 6/18/2003

This Amendment is submitted in Revised Format

I. Specification Amendment

In the Specification

Delete the paragraph starting on page 19 and extending to page 20 and replace it with the following paragraph ((with changes shown), reading as follows

The Bowler's Aid may include a stop means to limit the backward deflection of the Bowler's Aid, for example under the force of the bowling ball. The deflection stop means may be any suitable device, as would be apparent to one skilled in the art from the disclosure. For example, such a deflection stop means could be an overleaf 24, as shown in Figure 8, attached or fastened to the at one end 27 to the support means 12a, 12b or held in place by the fastening means 18a, 18b, or attached to the Bowlers Aid at one end by any suitable means as would be apparent from one skilled in the art from the disclosure of the inventive principles. A free end 27, of the overleaf [26] 24 may extend over that part of the support means 12a, 12b, whose deflection is to be limited such as, for example, that part of the support means shown as between numerals 28 and 29 denoting the free part of overleaf [26] 24. A similar deflection stop, as would be apparent to one skilled in the art from the disclosure of the inventive principles, could be used to stop forward deflection of the bowler's finger toward the palm of the bowler's hand, for example, when
